Low Current**

## Construction and Maintenance

We specialize in the field of Buildings Construction and maintenance. We have many projects over the past five decades that have served many major clients from government agencies and private entities. We excelled in completing these projects successfully and with high quality and within the specified timetable due to our experienced professional leaders, qualified workers, modern equipment, and accumulation of experience. Over the years in the field of construction and contracting.

## Electromechanical Works

We worked in electromechanical works, such as escalators and elevators, by providing the best engineers and systems. We have concluded local and international partnerships to provide smart and advanced solutions, using the latest scientific findings in the field of control, monitoring and automation, in addition to other electrical and mechanical works.

## Refrigeration & Air Conditioning Work

We have local and international partnerships with the world's leading refrigeration and air conditioning companies to provide high-quality central cooling systems and devices to contribute to providing customer requirements, and with the implementation of our team specialized in equipping major facilities with appropriate cooling systems

## Decoration & Interior Design

We have a team specialized in rehabilitating and restoring facilities and buildings to take on new roles while preserving their components, maximizing their capabilities, and strengthening their structure, in addition to providing the latest finishing and decoration works, as we have carried out many finishing and decoration works for a large number of clients in our previous projects, as we have an elite group of distinguished and capable interior design. To make a difference and produce distinctive and unique modern decorations that contribute to providing added value to our customers.

## Safety & Fire-fighting Systems

We carry out projects in the field of safety and firefighting systems, by providing the best systems and equipment for fighting fires. We have concluded local and international partnerships to provide smart and advanced solutions, to contribute to protecting the lives of individuals and raising the efficiency and readiness of facilities in preventing and fighting fires in the event they occur, God forbid.

## IT. & Low Current

We carry out the delivery of state of art solutions involving the latest technologies and considering the best commercial offers, and infinite after sales service for our projects.
